Making the Most of Closet Room.

If one is short of closet room a very

good plan is to hang skirts sideways in

the closet instead of hanging skirts,

frocks, and coats all against the back

wall of the closet. Frocks may also be

hung sideways, leaving only the coats to

of the closet and to screw small hooks on

ide of the shelf, each pair of hooks be-

ing meant for a single skirt or frock.

Two loops of braid are sewed in each

skirt band and two in each frock at the

waist line, one loop being hung on each

hook. The garments are much more easily

gotten at in this way than when they

are hung one over another at the back

of the closet. This method of hanging

also permits the garments to hang per-

fectly straight, and makes it possible to

store a large quantity of clothes in one

loset. If the closet is deep enough the

coats may be suspended on stretchers

from the shelf. This is an ideal arrange-

ment, for it leaves the closet door free

for a pier glass, which is a most useful

MORNING CHIT-CHAT.

D ID she have a mother? Whenever I read or hear in any way of some girl who has made a great mistake, who has slipped and fallen into the mire from which she may never be able to wholly cleanse herself, my first question always is that: "Did she have a mother?" And in at least three out of five cases I find that either the girl had

no mother at all or none who deserved that beautiful title, Roberta de Janon, the poor, sentimental, unhappy little girl whose escapade has been the talk of a country, whose silly school girl love letters have been read from the Atlantic to the Pacific, who has marked herself for life by one week's experiences, would never have made such a

mistake if her mother had not been dead. The young newspaper woman who shot herself at a hotel in Virginia a few weeks ago grew up unmothered. I happened to know her personally, and I fully believe that if she had not lacked a mother's care and guidance in the past fifteen years she would never have wandered into the wilderness of despair whence the only way out seems that terrible short

In Barrle's book, "Sentimental Tommy," is a passage in which Elspeth, Tommy's sister, is asking God to forgive her for not doing something

that she thinks she ought to do, but does not dare. "The offer to change places with Grizel was beyond her courage, and she tried several childish ways of getting around God, such as going on her knees and saying: 'I'm so little and I hinna no mother!' "

"That was not a bad way." comments Earrie. It seems so to me, too. I can't believe God doesn't take that into account, and I believe human beings should, too, far more than they do. The larger part of many people's goodness is simply their environment-although most of them never know it.

It seems to me that sin is relative. I cannot help thinking it is as bad in a way for a girl who has had a splendid bringing up, who has lived all her life in an atmosphere of refinement and high ideals, to demean herself even a little, as for the girl brought up in the gutter to live the life of the streets. Worse, if anything,

You read or hear of sinful or foolish women, and you think of yourself as better.

Maybe you aren't. Maybe you are just more fortunate And to your greater fortune it seems to me you owe it to judge very gently those of your less fortunate sisters who have snatched at the sweets of happiness and found the bitterness of disgrace

And to judge most gently, of all those who found it hard to be good because, like little Elspeth, "they hadna no mother."

trude from the earth, while at night the latter case a medium weight shoe will

Religion, being founded on love, one satisfactory arrangement can easily be with the other great institution founded | But when there is a wide difference on love-marriage. But it does. More of religious views, the problem is apt to than one couple might be happily mar- be more serious. A Jew loved a young girl who had no decided religious views generally followed life would take on a

more sympathy with his beliefs. But he saving and comfort for declining years not interfere with their happiness have thought, and so did she, that not being would be the reward. It has been estilived to see their happiness ruined by a believer in any creed would in this mated that a man's working life is these differing beliefs. So that, if there case result in greater happiness for them twenty years, a number on which to is a difference of religion between two both. They became engaged. He was plan even when it can be extended. If young people who love each other, it is a strict Jew, rather high in the religious 10 cents of every dollar earned in those just as well to consider seriously what before it dawned upon her what it would vested there would be no fear of the fuaffairs of his people. It was not long days could be put away and safely ineffect it may have on their lives before mean to be married to him, and what ture beyond the period of work. Think they take the decisive step of marriage, various ceremonials would be an every- that over when your son or daughter be-If the two would get down to the prin- day part of their life. She thought it gins to earn money, BETTY BRADEEN. en. It was better to see thus plainly beforehand, for had they married, there would no doubt have been continual

In cases like these, it means one or the other must yield entirely. This might that his own is the only religion and as well be understood at the beginning, that the other must come over to his and if neither is willing to make the sacrifice, the marriage had better not go on. It will only mean unhappiness. Certain religions require certain definite formalities of their followers. There can be no divergence, no half-way measures. One must yield full obedience or none at all. When religious differences of this sort arise, the two had better face the situation squarely and one or the other make the sacrifice. If they know husband might go to the wife's church they cannot make the necessary concessions, or cannot be happy in doing so, then they had better not marry.

Original and Genuine

Others are Imitations The Food Drinkfor All Ages RICH MILK, MALT GRAIN EXTRACT, IN POWDER

FROM WOMAN'S POINT OF VIEW

A cook in an obscure little restaurant has inherited a fortune, enough thousands to turn the head of a man who has had to skimp and pinch all the days of his life, yet this particular man is holding tight to the job that assures him a living till the former is actually in his keeping and is giving it the same faithfulness that characterized him when he knew nothing better in store,

It is not probable that he will remain in humble surroundings when he has the means of gratifying fancies which have been kept down by the hand of necessity, but he is certain to be a credit to his manhood in the future as he has in the past. There have been numerous instances where the mere possibility of prosperity has permanently disorganized life. There have been men and women who were hard workers and apparently satisfied with life as they found it till the hope of a fortune upset them. They did not wait to get the money in the sensible fashion of earning enough for present wants, but immediately began to live in accordance with the prosperity which did not materialize after all.

I once spent a summer at a little English resort where the most important personage was a man who fixed his eyes on a goal years before I knew him and turned neither to the right nor left in his path to it. He had nine beautifu children, all of whom were educated in the thorough manner of foreign cour tries, the sons being fitted for professions and the daughters converted into women of culture and refinement. He was a contractor and his ambition was to amass \$50,000 and buy a small estate near London and retire to the rest he had

He had reached his goal that year and removal to the new home and there was number and choice of one's house plants of the Atlantic, and the brother next in little potted asparagus fern will mean line had been laid to rest in the little some living, growing thing that gives mourning for him. Fifty thousand is not doors beyond the city limits and rewell invested in that man's country it nature, writes Bertha Kobelt in the Chimeant comfort and ease for him and his family, and I have always regarded him as a man of great good sense.

If this man's example could be more of any kind. Perhaps had she been a new significance. The best years of manchurch member she might have had hood would be devoted to earning and

LATEST FASHIONS.

GIRLS' AND CHILD'S SACK APRON. Paris Pattern No. 3184

For the protection of pretty dresses this neat little sack apron will prove very effectual, and indeed it can serve as a dress itself, for it is so attractive As pictured, it is made of cross-barred cambric. Other material which may be used for it are lawn, long cloth, cambric, dimity, chambray, gingham or percale. If a more dressy effect be desired the collar, wristbands and pockets may be trimmed with lace or embroidered edging. Very pretty aprons of this pattern are made of fine cheeked gingham worked in cross stitch in dark blue and red cotton, the decoration appearing on the collar, wristbands and pockets and around the lower edge. The pattern is cut in five bizes-4 to 12 years. For an -year-old girl the apron requires 21/2 yards of material 36 inches wide,

POTTED FLOWERS AND PLANTS; HOW TO TAKE CARE OF THEM

tory even of the miniature kind-in fact, some beautiful Farlyense, maiden hair, a south or east side bay window is or asparagus ferns, for all ferns thrive sometimes quite as much out of the best in the shade, that is, of course, if the household goods were packed for question-one may always regulate the given plenty of water, rejoicing, although the eldest son, who according to conveniences and facilities had an American bride and a growing for taking care of them. In short, bought reasonably. Shoots and sprouts practice, elected to remain on this side everybody can afford a few. Even a much of a fortune in these days, but minds you of the lavish abundance of

cago Tribune. House plants always come handy as material for decoration for such occaions as home entertainments and parquite gratifying to be able to lend a hand in embellishing the pulpit for festive Sundays. If there should be a wedding in your family, your ferns and your baby palms and begonias will be hand some accessories to the general floral decorations. During the winter time a small house plant with bright blossoms set in a dainty little jardinfere that will conceal the ground and clay pot are an excellent substitute for the fresh cut especially when they are expensive.

uld won he guerge to house plan huddled primly into a bay window, let every member of the family take care of one and find a suitable place for it in their own chambers. Men are often quite as fond of flowers as their fembnine neighbors, and they manifest just as much solicitude for a pretty little fern or geranium in an attractive pot that is intended to add a touch of grace and beauty to their surroundings.

Flowers in the Bedroom.

The light and space of the average bedroom will scarcely allow more than one of these; therefore let it be an attractive specimen. Some people have the mistaken notion that house flowers are unhealthy in bedrooms. But on the contrary they have quite a salubrious effect on the sleeper who doesn't raise his window at night. They are a boon in an unventilated room, as they absor out among the trees is unhealthy would be quite as credible Probably none of us would approve of

a barricade of flower pots in the kitchen window; where there is much bustle and and subject to rude jolts. In fact, more than one plant on the ordinary window sill is out of taste and quite a nuisance to such as are addicted to the gazing out habit. To prevent stain and marks on the polish or stain of the window sill, an asbestos or flannel pad should never be omitted. A small wire stand that will accommodate a dozen plants is convenient where flowers are a confirmed One may have an attractive array of

House Plants at Small Cost.

House plants, with pot and all, can be sell for almost nothing; gardeners and florists are generally glad to dispose of them during the setting out and the pruning season. Broad, full leaved geraniums in full bloom are often sold as low as 50 cents. But half the charm and joy of cultivating indoor flowers comes from trimming and training the wee, insignificant, gaunt-looking sort into an imposing plant with a glory of breaking ties. If you belong to a church, it is buds and clean foliage. It doesn't although experience is always an asset. The geranium, which is one of the nost popular of house plants, requires fairly rich soil-florists as a rule get their ground for this plant in woodland fence corners, where it is continually being fertilized by decaying leaves and twigs. The soil of notted flowers hardens easily. owing, no doubt, to the hard water used in sprinkling, which always leaves flowers on your dinner or lunch table, For this reason it should be loosened or stirred up with a garden knife about lant will exhaust the fertility of the soil in a small pot in a short time, hence the importance of allowing a tub or ves sel in proportion to the size of the plant, Farmers believe in a rotation of cropsthat is, allowing a field to lie fallow or to go as pasturage after a year of great productivity. From which it follows that flower soil should be frequently renewed Fertilizers, especially the patent kind, hould not be experimented with, as it may unduly force growth, which is like-

> Cactus Needs But Little Water. The cactus naturally requires a dry,

y to be harmful in the end,

alkaline soil, such as it has in its native han once in three months, and then not too generously; it absorbs all its moisture and most of its food from the airpoisonous gases. To say that sleeping in fact, frequent sprinkling of excessive drenching invariably proves fatal to it. When you get a plant the origin and haracter of which you are not familiar with, it is a good idea to look it up in the encyclopedia. When you know tha activity they are invariably in the way native home of your flower you can make a neat guess as to the treatment and onditions it will best thrive under. Calla lilies, violets, and hyacinths when potted can stand daily watering and

thrive the better for it; but half a pint of soft water-cistern rainwater is the est-should be the maximum allowance at one time Dahlias, gillyflowers, carnations, digitalis, and roses want garden soil of

nedium richness only, and they need not be watered more than once in two or house plants without taking special les- three days. Palms and aloes hall from sons in horticulture or importing fancy Egypt and the dry East, and they can orchids or rare exotics from the South stand any amount of drought, though Sea Islands. There are large varieties they need a far richer soil than the cacof domestic and old-fashioned plants, or tus. Ferns, which literally grow in the such as have been imported way back in water, naturally need a liberal bath once All house plants should be minutely
